

# Find Album Artwork with Google v2.6

AppleScript for iTunes  
written by Brett O'Connor  
updated by Doug Adams

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script performs a Google image search on the selected track's album and artist name with the hope of finding the according album artwork.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

## Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

## How to use:

Select a track in iTunes and run the script. If you need more help, check out this HOWTO:

<http://www.negatendo.net/content/find-album-artwork-HOWTO.html>

Some of the code in this script was shamelessly borrowed from Apple's Cddb Search by Album script (especially the stuff that makes a string all query-string-y).
