

I Hate That iTunes Done Chime! v2.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

Change the sound iTunes plays after importing or converting a track to your choice of a System sound, no sound, or your choice of some other AIFF sound file.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

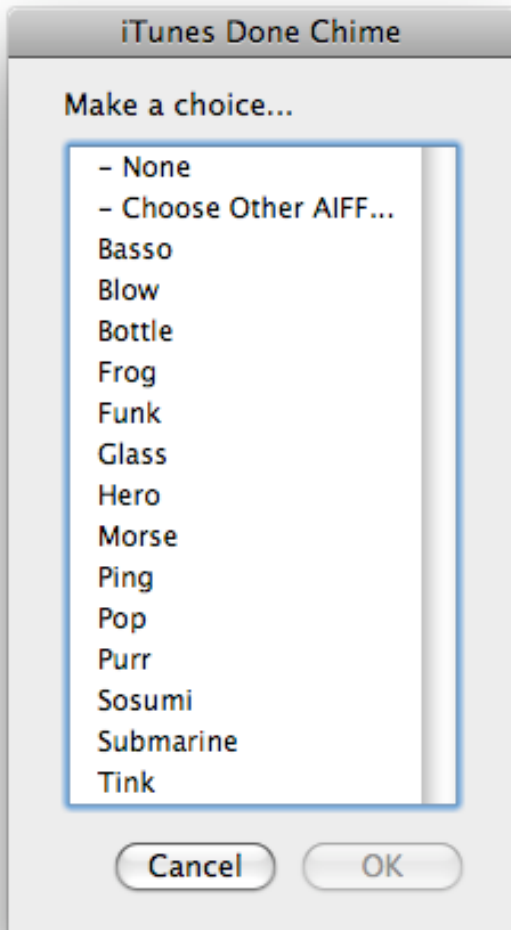

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Run the applet from the iTunes Script menu or by double-clicking its icon in the Finder.

You will be asked to select an option from this menu:

You can select one of the System sounds, no sound, or choose your own sound.

If you select "- Choose Other AIFF..." an Open dialog will allow you to select an AIFF file. A short AIFF sound file is best, 1-2 seconds at the longest. Do not use the entire "Stars and Stripes Forever", for example.

Later, when you run the script again, you will have an opportunity to restore the original sound. (Which I hate.)
